

Diab har hittat en bra balans mellan CO2-
besparing och innovativa nya lösningar

Diab gör lätta och starka material som blir lika starkt som stål, men 20 gånger lättare!

1400 anställda i 20 olika länder

Vi bestämde oss i februari 2017 och i September 2017 blev våra mål godkända!

ScienceBasedTargets.org is the only organization in the world that can approve these targets and is built up by:

- United Nations Global Compact
- World Wildlife Foundation
- World Resource Institute
- Carbon Disclosure Project

Diab is #1 in the local area of Halland, #8 in Sweden and #123 in the world!

Ca 500 företag har bestämt sig, vi vill gärna se fler, har utmanat våra branschkollegor!

Vår plan bygger på lokala möjligheter vid våra 6 fabriker i Sverige, Italien, Litauen, USA, Ecuador och Kina

Diab Group commits to reduce:

- **Scopes 1 and 2 emissions 35% by 2022** and 80% by 2050, (from a 2016 base-year)
- **Scope 3 emissions 12% by 2022** and 49% by 2050 (from the same base-year)

Strategiskt är detta viktiga steg för transformationen från fossilberoende och fossil-frikopplad tillväxt

Cynthia Cummis, Director of Private Sector Climate Mitigation at World Resources Institute, member of the Science Based Targets initiative steering committee said: *“We congratulate Diab International for their newly approved science-based target. By setting a target that aligns with global efforts to mitigate the worst effects of global warming, Diab International are future proofing their operations and priming themselves to thrive during the low-carbon transition.”*

I Sverige hittade vi en möjlighet att både spara pengar och spara CO2!

PRESS RELEASE - FEBRUARY 6, 2018

Laholm's largest industry becomes 100% fossil free with Adven

Swedish core composite manufacturer Diab AB has signed an agreement for the supply of hot water and heat with energy company Adven AB. By switching to biofuel, Diab's production facility in Laholm will be 100% fossil free by 2019.

Tack!
